Applicant's amendment dated January 29, 2009, has been fully considered.

First, Applicant is requested to confirm the status of claim 16, which seems to be canceled in the prior amendment, but reinstated in this amendment which is improper.

After carefully reviewing Applicant's amendments, the Examiner agrees to withdraw the art rejections. However, this amendment seems to introduce new matter and a new ground of rejection has been made.

Claims 13-15, 17-21, are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

It's unclear about two newly added limitations to the claims: 1) the independent chambers, what exactly does Applicant mean by "independent"? It seems all chambers are dependent from each other to form 5 stages in an internal combustion engine. Also, Applicant may consider the term "internal combustion engine" in this application because the combustion chamber seems to be in a separate chamber as argued in this amendment. Therefore, this maybe an external combustion engine, please confirm. 2) The Examiner is unable to find the new limitations of claim 18 "wherein a rolling piston of the second stage chamber is connected by a shaft to a rolling piston of the fourth

stage chamber and the rolling piston of the first stage chamber is connected by a shaft to a rolling piston of the fifth stage chamber". Please point out specifically in the original disclosure where said limitation can be found.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lamont, and Vitale disclose internal combustion engines having separate chambers.
